WAGE & PRICE CONTROLS STILL BEIN' TALKED

MOVING? Please use form inside paper and give full information. Missing list is run on Friday for following week.

There isn't very many times the Economic Commission is discussed that someone doesn't bring up the possibility of wage & price controls and rogues of how many times President Carter or some other administration official has said in that direction there is still considerable unease on the part of most everybody. Straws in the wind like Carter's efforts to control prices of food and housing, or the move to jow-hone industry and labor into less inflationary wage & price hikes keeps the notion on the front burner.

Situations on the Labor Front to which we have alluded in health & safety services, including teachers and postal workers, wswk off the job in illegal strikes with impunity clearly demonstrate that not only swimming, but to Law itself, cannot be used to apply in the labor market. There is a lingering doubt that prices of most

President Carter assured a group of cattlemen Tuesday that he would not impose price ceilings on beef. He left open any future action on raising or lowering beef import quotas.

1978 Lamb Crop Shows 7% Decline, Wool Output Drops

Washington, July 19 (USDA) — The 1979 United States lamb crop was estimated at 8.03 million head, a 7% decline from 1977 and 10% smaller than 1976. On January 1, 1978 the inventory of breeding ewes 1 year old and older totaled 6.54 million head, 4% less than a year earlier. Ewe lambs under 1

year on January 1, 1978 totaled 1.48 million head, up 6% from a year ago.

The 1978 lambing rate (lamb born per ewe) was 100 percent, compared with 97 percent averaged in Western states per 100 ewes 1 year and older on hand January 1 was 94 compared with 97 in 1977.

This year's lambing rate was the lowest since 1969 due to the effects of prolonged cold weather. In Texas, poor and minor grazing conditions and unfavorable conception rates reduced the lamb crop.

Wool shorn and to be shorn in the United States during 1978 is estimated at 100 million pounds, 9 percent less than at 100 million pounds, 9 percent less than in 1977 and 9% below 1976. The number of sheep and lambs to be shorn is estimated at 12.6 million head, a 5% decline at last year.

**GREAT PLAINS WESTERN
ACQUIRES DONAHO RANCH**

Great Plains Western Corporation, Inc., Purbled Angus and Brangus cattle, recently purchased the Donoho Ranch located near Florenceville, Texas. Negotiations were handled by R. C. Chapman, President of Great Plains Western, and Ken Wendland, of Western Farm Minkogeneration, Inc. The Donoho Ranch is being used in conjunction with Great Plains' three other ranches in the area. Primary use of the ranch, which has extensive feeding facilities, improved pastures, and irrigation, will be for growing and developing purebred and crossbred cattle. Great Plains Western operates ranches in Texas, Oklahoma, Minnesota, and Virginia.

Heifer Feeding At Record Level

Amerilla, TX. — Perhaps the most important aspect of USDA's July 1 Cattle on Feed report is not the 12% increase in cattle in feedyards, according to Texas Cattle Feeders Association market analyst Joe Wood, but the fact that it showed a record number of females entering the feedlot.

"We've still got liquidation-period levels of heifer feeding underway in this country," said Wood. "The report showed 4,001 million head of heifers on feed — 20% higher than last year and up from 1979."

"This is probably an early indicator of what we'll see when USDA releases its mid-year cattle inventory report next week — that herd liquidation has continued, and maybe at a faster rate than we've seen in the past."

Wood said the higher level of heifers on feed is also important because the

Cattle on Feed July 1 Up 12%, Placements Higher

Washington, July 19 (USDA) — Feedlots in 23 major feeding states held 10.9 million cattle and calves for slaughter on July 1, 1978, according to the Crop Reporting Board, 12% more than a year earlier but 7% below April 1, 1978.

During April through June, 6.53 million head were placed on feed, a record high and 10% above the same quarter in 1977. Other disappearance was estimated at 734 thousand, leaving net placements of 5.80 million. Other disappearance totaled 714 thousand and 519 thousand during this quarter in 1977 and 1976. Marketings of fed cattle for slaughter in the April-June quarter amounted to 6.58 million head, up 7% and 11% from those months of 1977 and 1976.

The total on July 1 included 0.98 million steers and older calves, 7% more than a year earlier.

Heifer Feeding At Record Level

(CONT. FROM PAGE 1)
heifers will go to slaughter lighter — and thus produce less beef — than would steers. "Thus, the higher number of heifers partially offsets the 12% increase in cattle pounds. We're still looking at larger supplies of fed cattle in September and October, but the 12% increase in numbers will not mean a 12% increase in fed beef."

Wood characterized the Wednesday report as "better than expected." He stated that in the 23 major feed states, there were 10,920,000 head of cattle on feed as of July 1. Placements during June were 8% above last year at 6,629,000 head. Marketings at 0,951,000 were 7% above a year ear-

offering of Simmental Breeding Cattle from the Alexander Ranches' Breeding and Selection Program.

Selling will be 10 three-in-one 7/8 pairs with 15/16 calves at side and 10 three-in-one 3/4 blood pairs.

Wood said the figures were unexpected. Trade estimates for the 23 states prior to release of the report indicated traders were expecting a 15% increase in numbers, a 12% increase in placements and only a 8% increase in marketings.

"This shows that the industry has done a better job than many of us had expected of keeping control of the inventory," said Wood. "It shows that if we keep selling cattle on an orderly basis, we may be able to work through the higher autumn supplies without any major problems. But the higher numbers also show that we could run into trouble, if we do fall behind in marketings."

Simmental Sire Summary Published

The 1978 national Simmental Sire Summary, rolling off the presses on July 1, provides in-depth performance reports on 1,119 purebred Simmental bulls — up a whopping 51% over a year ago. The report pointed to "substantial increases, running as high as 69% in one heritable trait, in the number of progeny reports available for inclusion in the 1978 Summary. As numbers increase, so does the accuracy and validity of this national comparison of Simmental sires."

The number of sire's daughter's first-calf performance reports increased 66% over last year. Animals with calving, weaning, yearling and carcass data increased 23%, 26%, 21% and 29% respectively. The 1978 Summary complete comparisons which were based on nationwide testing conducted by more than 30,000 members and non-members, Don Vaniman, executive secretary of American Simmental Assn., said.

Northwest Pinzgauer Breeders Ltd. Building Quality Pinzgauer Herd

In the northwest corner of Minnesota, Dr. Louis and Joannette Fritzsche operate three farms which are collectively the Northwest Pinzgauer Breeders Ltd.

The Fritzsches started breeding Pinzgauer in 1974 after visiting with and catching Pinzgauer animals from Msl. Lower of Helena, Montana. They went to Alberta and purchased about 150 purebred herefords and had them then back to Karstad, Minnesota.

At the present time there are nearly 600 head on the farms. Steers are old and fat and the Fritzsches on the farms and bulls selected as candidates for breeding to commercial herds are performance tested on the farms, using outside workers for verification.

The Fritzsches' purebred Pinzgauer Bull, Dor Koenig, is lodged at Tylor, Texas, and his first calves began arriving this past spring. Miss Elia, a purebred female from Canada, also resides with the Fritzsches on the home farm.

above 1977 and 4% above 1976, and accounted for 68% of the total on feed. Heifers and heifer calves reached a record high, 4.01 million head, 20% more than last year and 18% greater

An example of the quality of the Pinzgauer calves being produced by Northwest Pinzgauer Breeders Ltd.

Cattle feeders expect to market 6.60 million head during July-September 1978, an increase of 7% over last year and 6% above 1976.

Cattle and calves on feed in the seven states estimated monthly (included in 23 states' total) were estimated at 7.98 million head, up 18% from last year and 13% above 1976. Placements during June totaled a record 1.77 million head, up 21% from a year ago and 27% over 1976. June marketings at 1.65 million were 7% above last year, but 2% below the previous month. Expected marketings for these seven states during July-September are 4.94 million, up 8% from the same quarter last year.

States by state figures and difference from a year ago for numbers on feed, placements and marketings, respectively:

Arizona: 278,000 (up 17%), 212,000 (up 3%), 181,000 (down 6%).

California: 666,000 (up 4%), 663,000 (up 16%), 621,000 (down 18%).

Free \$50 Bills At Maine-Anjou Field Day August 12th

Coleman, Texas — Two \$50 bills to be given away will be waiting for persons who attend the Texas Maine-Anjou Assn. and Texas Junior Maine-Anjou Assn. field day at the Rhone Ranch two miles west of here on Highway 83 on Saturday, Aug. 12, beginning at 8 a.m.

One \$50 bill will be awarded in a drawing that afternoon from names in the registration box, and the other to the person who guesses closest to the weight of three fullblood transplants hatched born May 1, 1977.

The field day will include a tour of the Rhone Ranch, inspection of working pens and cattle, and a barbecue lunch catered by KKK Pit Bar-B-Que of Coleman. Dr. Ben Hopson of Laredo, a director of Texas Maine-Anjou Assn. and one of the founders and charter members of American Maine-Anjou Assn., will bring several Bra-Matoes, crosses of Brahman and Maine-Anjou cattle, to the field day to help publicize the field day.

AMA's newly formed Bra-Maine Assn. There will also be Maine-Anjou cattle from all over Texas brought to the field day for display. Included will be a 7/8ths Polled black bull, 7/8 and 3/4 bred and open cows and heifers, show heifer and club steer prospects, all for sale at private treaty during the field day.

First Round Results On Maine-Anjou Steer Sweepstakes

The Cactus Feeders, Inc., feedlot, in Cactus, Texas, in conjunction with the American Maine-Anjou Association, recently announced the first round results of their St. Patrick's Day Steer Sweepstakes. After being on feed for ninety days, the thirty 3/8 blood or better Maine-Anjou steers

Texas Junior Maine-Anjou Association Organized Recently

San Angelo — The Texas Junior Maine-Anjou Association was organized in a meeting of about 20 young Maine-Anjou enthusiasts at the recent San Angelo Stock Show & Sale.

Mollis Strickland of Crowley was elected president; Kelly Strickland, Crowley, vice president; Patrice Propst, Anson, secretary-treasurer; and Holly Pederson, Cooper, public relations.

Brahmanes, Black-Maines Are Coming Along

Two new Registration programs are currently being formulated by the American Maine-Anjou Association. These programs will encompass Brahman/Maine-Anjou cattle crosses and Black Angus/Maine-Anjou cattle.

Jerry Adameco of Cody, Nebraska, will be officiating. Jerry is a prominent cattle judge and is considered to be an expert in the commercial cow-calf field. Details on participation are to be announced.

CRITICAL DEMAND FOR REGISTERED MAINE-ANJOU

Today the American Maine-Anjou Association announced a critical demand for registered percentage Maine-Anjou females and percentage Maine-Anjou bulls. Due to renewed optimism in the beef cattle industry there is at present a tremendous demand for registered animals and their inheritable traits (i.e., high average daily gains, early and heavy weaning weights, top-grade carcasses).

To stimulate registration and attempt to satisfy demand, the AMAA is announcing a "TWO for ONE" registration promotion.

You may register your animal by contacting the American Maine-Anjou Association, 584 Livestock Exchange Bldg., Kansas City, Missouri 64109, (816/474-8555). This promotion is limited. Early participation is encouraged.

Replacement Cattle Mostly Lower Last Week, Lights Best

St. Joseph, July 21 (USDA) — National feeder cattle and calf receipts this week 183,000, last week 182,000, week year earlier 182,000. Feeder cattle and calves steady to 5.00 lower than the previous week with the most declines usually on steers over 700 lbs. and heifers over 600 lbs. The most prevalent price pattern presented this week was a lower trend on fleshy cattle to go direct into feedlots in sympathy with lower slaughter cattle prices.

Cattle suitable to go on grass, especially thin offerings to best demand and sales later in the week, after the release of a cattle on feed report, often on a higher note. Notably Amarillo, Springfield, Mo., Kentucky and lower sections Arkansas higher on calves under 400 lbs.

Feedlots in 23 major feeding states reported 12% more cattle and calves than a year earlier but 7% below April and this considered bullish by trade members.

Also good rains and forage condition with prospects of the season except southwest temperatures over the century mark most days for the past month.

Priefert Bale Buggy III

NO WINCHES
NO HYDRAULICS
NO ELECTRICAL CONNECTIONS

Handles the bale as gently as hydraulics from the comfort of your cab. Works in bad ground conditions.

Priefert Squeeze Chute

Easy-to-use one man squeeze chute. Controls for entire chute operation in one convenient spot. Head gate holds animal firm without choking, regardless of size. Quick, powerful side squeeze eliminates electrical or hydraulic units.
